Retain

Anything that **STORES**
your goods

Restrain

Anything that **STRAPS**
your goods

Maintain

Anything that **SAFE-**
GUARDS your goods

ABOUT US

Omni-tuff Group is an Australian-owned company with a global supply chain. The company specialises in long-term protection and storage for critical spares and equipment. We are passionate about preventing wastage of resources and time. Hence, we continually innovate new solutions to help our customers achieve safer, more effective methods of Retaining, Restraining and Maintaining their assets, whether it be in the warehouse, or out in the field.

OUR CAPABILITIES & COMMITMENT

With a large distribution facility with over 5000 SKUs, and an in-house Strapping Tool Service Centre, we are well placed to fulfil customer requirements.

With respect to Chain of Responsibility obligations that our customers face, we have included a qualified engineer in our direct network to ensure specific products are certified to specific Working Load Limit & Break Strains. This assists customers in selecting the correct storage methods on a daily basis. In conjunction with organisations such as National Heavy Vehicle Regulator, Omni-tuff sponsors and conducts Chain of Responsibility training & seminars in regional & metro areas.

With ongoing requirements for training to achieve Best Practice in Retaining... Restraining... Maintaining of product, we also include the Omni-tuff Power Pulse Training modules in our offering to major clients. This includes free on-site training.

OMNI-TUFF & BLACKWOODS

The relationship between Omni-tuff and Blackwoods started over 10 years ago, when Blackwoods began selling our Orange Polywoven Strapping (Page 9). In fact, when we ask 'Have you heard of Omni-tuff' in our Blackwoods Training Sessions, most will point to the iconic orange strap!

Since then, our relationship has grown considerably. Now with an increasing presence in the Blackwoods catalogue, Omni-tuff is an approved vendor for a host of products – with a view to advising on long term storage and safety compliance for equipment. However, enough about us, let's talk about you!

With a large national reach and skilled personnel like yourselves, Blackwoods is a valuable partner. Take the Omni-tuff Camlocks for example (page 10). These were developed for Blackwoods with Blackwoods in view of providing safety at height for your own operations.

Today, we run training sessions around Australia with people like you, and are here to provide technical assistance on products and enquiries. We can't expect you to know everything about every product! Got any technical questions? Need help to find a solution? Want assistance on pricing? That's why Omni-tuff is here.

what do our customers say about us?

RETAIN

"We used to source this from a different vendor however I am intrigued that our site contacts said that you have cages that are better suited to our requirements and a little more hearty. I'm glad to be able to log some savings in the purchase as well."

– **Procurement & Energy**

RESTRAIN

"We also thank you again for the continued communication and feedback throughout the entire process, from product development right through to the straps landing in our Warehouses. The Omni-tuff CamLock tidy straps will greatly improve the safe storage of goods in our pallet racking."

– **Multinational Service Provider**

MAINTAIN

"We exclusively use OMNI-TUFF for all transformer breather systems and consumables and would happily recommend the brand to others."

– **Leading Provider of Utilities**

"We're using OMNI-TUFF Seal'n'Peel and the performance is perfect. Seal'n'Peel is protecting the flange face very well [from corrosion] and it's very easy to use."

– **Global Construction Company**
