

CERTIFIED FOR STORAGE, FORKLIFT USE & CRANE LIFT

RHINO WORKSHOP BASKET

A WIP Basket replacement that minimises LTIs.

A consistent and certified approach to the handling, storage and movements of parts in your workshop. Replacing a vast range of potentially hazardous, inconsistent & uncertified work in progress baskets used globally within CAT Dealers.

Focusing on safety, an integrated divider system to mitigate the risk of pinch points, crushed fingers and hand injuries when handling parts in and out of the baskets.

FEATURES / KEY BENEFITS

SAFETY

Includes divider system with the option to add multiple dividers to create divisions and minimise pinch points, caused by uncontained parts and equipment.

EASE OF HANDLING

Forklift and crane compatible with a 1T static load rating and certified crane lift points.

STORAGE EXCELLENCE

Storage certified, stackable up to 3 baskets high, and pallet racking compatible, ideal for areas with limited floor space.

SWITCHING TO RHINO WORKSHOP BASKETS

Before vs. After Comparison

HIGHLIGHTS:

- Designed and engineered in Australia
- Certification where there was none before
- Mitigating risk of parts dislodgement, pinch points and hand injuries.
