

XYPHOS®

by DAYWALK BeAssured 

The all-new XYPHOS®

For a safer and greener supply chain

Long-term storage and transport safety has now been revolutionised with XYPHOS® - the brand new pallet design from Daywalk.

With a commitment to innovation that reaches into the extraordinary, XYPHOS® excels as an alternative to timber pallets for long-term storage on every metric.

Switching to XYPHOS®

SUSTAINABILITY

The long lifespan and durability of XYPHOS® pallets make them a more sustainable option, appealing to companies looking for environmentally friendly solutions.

SAFETY

Lighter than hardwood with specialised strengthened under-rails, strapping forces are supported and certified to guarantee safer storage and transport.

DURABILITY

Lasting up to 3-5 years as compared to the typical 1-year lifespan of hardwood pallets, XYPHOS® is more cost-effective and durable than any other pallet solution over time.

Australian owned and operated, Daywalk continues to lead the way in storage and transportation solutions. XYPHOS® is the latest in a range of products that provide the solutions you have been waiting for.

- Designed and engineered in Australia
- Certification where there was none before
- No more risk of cargo dislodgement
- Green-friendly with easily sourced, reusable, recyclable, durable steel
- Protection from timber price increases
- Always in stock

Patent App 2023901075

Product Data

SIZE: 1160mm x 1160mm

- **Certified for storage and transport:**
 - 500kg Transport Rating (with use of correct rubber)
 - 1000kg Racking Rating
 - 3000kg Storage Rating including forklift handling
- **Key features:**
 - Racking compatible
 - Powder-coated finish
 - Lighter than hardwood equivalent
 - Options for friction rubber for transport case
